POWER CAST 1700 INDUCTION CASTING MACHINE Technical information. Supply Tension:----- 220 volts diphasic. Network frequency:-----50/60 Hz. Maximum power:----- 3.000 Watts Maximum current:----- 14 amp. Casting maximum temperature:--- 1.750C Water flow at 2kg/cm:----- 4 liters /min Argon flow :----- 10 liters / min Maximum refrigeration water temperature:- 35C Maximum room temperature.----- 40C Net weight:----- 63 Kg. Width----- 0,6 m Height----- 0,53 m Depth----- 0,72 m Casting time: 0,6 gr/sec (nickel chromium alloy, casting temperature of 1.340c) System operation: continuous, without cycles of limit. Maximum velocity of the centrifuge arm: 450rpm Minimum velocity of the centrifuge arm: 350rpm Maximum diameter of the casting ring: 120mm 4.71 inches Maximum length of the casting ring: 80mm 3.5 inches Casting maximum capacity: 100 gr nickel chromium alloy. Metals that can be casting: except titanium. Package contains - Equipment. - 3 ceramic melting pots. - 3 ceramic receptors. - 5 ring mountings of several measures. - 1 water entrance hose. - 1 water exit hose. - 1 steel receptacle. - 1 water pressure inspection device. - 1 bracket. - Instruction manual. - Warranty certificate. Equipment with argon device is accompanied by one more hose and 2 brackets.

ECCO LIGHT-S-II Item # 101921 Carton LED curing light S-II is a perfect combination of the highly efficient LED tube, the micro-control electric circuit and the rechargeable lithium battery. So it is featured with highefficiency, outstanding function, convenient operation, and longevity, making it become the latest top product in the global dentistry market.

1. It can produce a strong blue light directly. The depth of the polymerization of resin material can reach 2mm.
2. It is a kind of cableless machine, equipped with rechargeable battery. When charged once, the machine can be used for 40 minutes continuously.
3. The machine can hang directly on the toothchair or the rack for special use for safety and convenience.
4. Convenient to operate: 5.Three preset curing light time from 102030 seconds.
6. The light intensity can reach 500mW/cm².

SPECIFICATIONS AND EQUIPMENT CLASS

- a). Power supply: Input voltage: 220VAC+10% Output voltage: 4.2VDC+/-0.1 Output current: 600+/-50 mA
- b) Internal power supply lithium battery: 3.7 v saturated electricity measures 700mAh charging time: about 2.5 hours
- c). Equipment class: Class A (Medical Appliance Classification Catalog)
- d). Protection from ingress of liquids: None
- e). Lamp: 3.6V AC, 3W
- f) Output wavelength range: 420-480nm (nanometers)
- g) Feature size: 20*198mm

1.5 Gallon (6 quarters) Heat Regulated Pressure Pot-Recommended for pour and self curing - Ortho resins too - Pot is factory preset for use at 20psi but is designed with external pressurization regulator for manual adjustment to use lower pressures For user safety a valve is set for despressurization of the pot when filled over 25psi - A manually adjusted element allows for a full range of temperature settings - Excellent for newer flexible and heat cured acrylics Description: 6 quart capacity (4 pour flasks) - 110 Volt - [curing unit unidad de curado olla presion acrilico denture] [polymerizator polimerizadoras] --- [Keystone Abrasives - Keystone Dental Tools][Us Dental Depot is speciali

Heat Regulated Pressure Pot

Although each pot is factory pre-set for use at 20psi, it is designed with an external pressurization regulator for manual adjustment to use lower pressures. For user safety a valve is set for despressurization of the pot when filled over 25 psi. A manually adjusted heating element allows for a full range of temperature settings. Excellent for newer flexible & heat cured acrylics.

- 6 quart capacity (4 pour flasks)
- Countertop design
- Variable temperature control
- Limited 1 year warranty
- Quick connect air line connector
- 120 volt
- Variable pressure control
